Introduction

The Release Note document for IPS Signature Database Version 7.17.09 includes support for the new signatures. The following sections describe the release in detail.

New IPS Signatures

The Sophos Intrusion Prevention System shields the network from known attacks by matching the network traffic against the signatures in the IPS Signature Database. These signatures are developed to significantly increase detection performance and reduce the false alarms.

Report false positives at support@sophos.com, along with the application details.
This IPS Release includes Zero(0) signature to address Zero(0) vulnerability.
