### Introduction

The Release Note document for Application Filter Database version 7.19.13 includes support for both, the new and the updated Application Signatures. The following sections describe the release in detail.

### New Application Signatures

The Sophos Application Filter controls the application traffic depending on the policy configured, by matching them with the Application Signatures. Application Signatures optimize the detection performance and reduces the false alarms.

Report false positives at [support@sophos.com](mailto:support@sophos.com), along with the application details.
